Cloud & DevOps Engineer with 6+ years of experience building scalable infrastructure, automating deployments, and improving system reliability. Strong background in AWS, CI/CD pipelines, and Infrastructure as Code. Proven ability to optimize data pipelines, reduce processing time from days to minutes, and collaborate across engineering teams to deliver secure, production-grade systems.

Experience

- JP Morgan Chase** Dallas, TX
Data Fabric Engineer Nov 2020 - May 2023
 - Designed and developed scalable data processing systems supporting enterprise banking operations
 - Improved ETL pipeline performance from **days to minutes** through system optimization and automation
 - Built and maintained backend services using **Spring Boot and graph databases (Neo4j)**
 - Led technical design sessions and implemented scalable architecture patterns
 - Automated workflows and improved system reliability across distributed environments
 - Partnered with cross-functional teams to deliver production-ready solutions
 - Mentored junior engineers and conducted code reviews to maintain quality standards
- Kibo Commerce** Dallas, TX
Software & DevOps Engineer Sep 2016 - Mar 2018
 - Designed and implemented **automated deployment infrastructure** for e-commerce platform
 - Worked with **AWS services and Infrastructure as Code** to provision and manage environments
 - Built CI/CD workflows to streamline development and release cycles
 - Improved system reliability through automation and monitoring practices
 - Collaborated in Agile teams to deliver scalable order management systems
- Ghoomo** Dallas, TX
Android Developer Jan 2016 - May 2016
 - Developed mobile application features from wireframes to production
 - Built backend integrations using MySQL and PHP for CRUD operations
- UT Austin** MS
Data Science Jan 2024 - Present
- UT Dallas** MS
Computer Science Aug 2018 - Dec 2020
- UT Dallas** BS
Computer Science Aug 2012 - May 2016
